Did not drink a can, bottle, or glass of soda or pop in the past 7 days (not diet) •	39.7	37.8	38.8	38.7	31.0
Ate breakfast on all 7 days in the past 7 days † *	35.5	26.8	35.4	27.2	25.0
Did not eat breakfast in the past 7 days *	16.0	19.7	16.0	19.7	22.0
Went hungry most of the time or always because there was not enough food in their home in the past 30 days	6.7	4.3	6.6	5.0	NA

1 in 3

of Honolulu County high school students felt sad or hopeless almost every day for two or more weeks in a row in the past 12 months.

2021 SURVEY RESULTS

HAWAI'I YOUTH RISK BEHAVIORS

HONOLULU COUNTY PUBLIC HIGH SCHOOL REPORT

HAWAI'I SCHOOL HEALTH SURVEY

The Hawai'i School Health Survey is a joint project of the Hawai'i Departments of Education (DOE) and Health (DOH) and the University of Hawai'i's Curriculum Research & Development Group. It is largely funded by the DOH Substance Abuse Block Grant. This publication was supported by Cooperative Agreement number NU87PS004309, funded by the Centers for Disease Control and Prevention (CDC). Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the CDC or the Department of Health and Human Services.

The results are representative of the 44,331 regular public high school students across the state of Hawai'i and the 29,541 Honolulu County public high school students.

For more information on the Youth Risk Behavior Survey and state and national results visit www.cdc.gov/HealthyYouth/yrbs/index.htm.

For additional Hawai'i State and Honolulu County results, including by sex, grade level, and race/ethnicity, visit the Hawai'i Health Data Warehouse at www.hhdw.org and Hawai'i Health Matters at www.hawaiihealthmatters.org.

The YRBS was administered in the Spring semester in 2019 and, due to COVID-19, in the Fall semester in 2021. Students' home and school life was dramatically affected during the COVID-19 pandemic, which combined with change in administration dates, may account for many of the findings.
