## Caveats

Statistical crime reporting requires a number of rules to count events consistently. Multiple offenses may be committed in most opportunities for crime, and multiple charges may be attached to a single arrest. The statistics presented in this report were collected and compiled using the FBI's Hierarchy Rule that limits crime counts to only the most serious offense committed within an incident that is constrained by time and place, and limits arrest counts to only the most serious charge per booking. Therefore, some crimes may be underreported, e.g., if the victim is killed in a single-victim robbery situation, only murder is recorded, not the crime of robbery. Further details of the Hierarchy Rule are discussed in Footnote 1 on page 2.

The number of reported offenses corresponds to a victim count for only some types of offenses. Violent crimes generally employ the total victim count. Robberies, however, are counted by the incident, regardless of the number of victims. Property crimes also are generally counted by the incident, with the notable exceptions that a burglary is counted for each structure entered, and a motor vehicle theft for each vehicle stolen.

Some crimes are inherently difficult to classify. The Uniform Crime Reporting (UCR) definition of aggravated assault, for example, is complex and has been misinterpreted, resulting in large variations between agencies and between years.

These statistics were produced from the operations of Hawaii's four county police departments. Statistics of prosecutorial, court, and parole board decisions are reported separately, by those agencies.

It is strongly cautioned that year-to-year changes based on small numbers of events are likely to result in large percentage changes which typically are not as meaningful as they might appear at first glance.

An unappreciated difference in the time period covered by two different sets of statistics can lead to erroneous conclusions regarding underlying relationships. For example, an abrupt change in the "percent of offenses cleared" statistics, which link the volume of arrests to the volume of reported offenses, should be viewed with caution because offenses already reported in previous years may be counted as cleared, by arrest or exceptional means, in the current year. A clearance is further defined in Appendix A.

The distinction between resident and de facto population is a most important consideration in viewing *Crime in Hawaii*. Crime rates are based on the number of crimes per 100,000 residents. De facto population includes the number of persons physically present in the state: residents, tourists, and non-resident military personnel. Crime rates based on de facto population can be significantly different than rates based on resident population. The UCR program uses resident population to calculate crime rates for all states. However, because of Hawaii's relatively small resident population and large visitor population, crime rates based on resident population are much higher when compared to rates based on the actual number of people in the state.

These and other issues surrounding the collection and compilation of crime and arrest data can contribute to the misinterpretation of statistics presented in this report. We welcome the opportunity to address the validity of readers' interpretations involving these crime statistics. Please feel free to contact us:

## EXECUTIVE SUMMARY

In 2014, a total of 48,651 Index Crimes\* were reported in the State of Hawaii, yielding a rate of 3,427 offenses per 100,000 resident population. The total Index Crime rate in 2014 was 0.9% below the rate reported in 2013, and 31.8% below the rate reported a decade earlier (2005).

There were 3,420 violent Index Crimes reported statewide in 2014, yielding a rate of 240.9 offenses per 100,000 residents. Hawaii's violent Index Crime rate in 2014 was 1.6% below the rate reported in 2013, and 10.5% below the rate reported in 2005.

There were 45,231 property Index Crimes reported statewide in 2014, yielding a rate of 3,186 offenses per 100,000 residents. Hawaii's property Index Crime rate in 2014 was 0.9% below the rate reported in 2013, and 33.0% below the rate reported in 2005.

Other highlights of *Crime in Hawaii 2014* include the following:

- The rate of reported offenses for three violent Index Crimes decreased in the State of Hawaii in 2014: murder, by 7.9%, robbery, by 0.5%, and aggravated assault, by 11.6%. Wholly attributable to the January 1, 2014 implementation of the FBI's revised and expanded definition for the offense of rape, the rate of reported rapes increased by 57.8% statewide in 2014. (Using the traditional definition, the rape rate decreased 11.2% in 2014.)
- During the first year of tracking human trafficking offenses in Hawaii, only one offense was reported for commercial sex acts, yielding a rate of 0.1 offenses per 100,000 residents. No offenses were reported for involuntary servitude.
- Rates of reported offenses decreased for three property Index Crimes categories; burglary, by 4.5%, larceny-theft, by 2.0%; and arson, by 26.0%, and increased by 12.9% for motor vehicle theft.
- Based on the proportion of arrests (plus cases closed by "exceptional means") to reported offenses, the statewide clearance rate for total Index Crimes decreased slightly, from 16.3% in 2013, to 16.2% in 2014.
- The number of Index Crime arrests fell by 6.3% statewide in 2014. Arrests for violent Index Crimes increased 5.0%, while arrests for property Index Crimes decreased 9.1%.
- Adult arrests comprised 83.2% of all Index Crime arrests in 2014; juvenile arrests accounted for 16.8%. *Crime in Hawaii 2014* provides state and county data on the age, gender and race/ethnicity of arrestees.
- The City & County of Honolulu's total Index Crime rate decreased 3.5% in 2014. The violent and property crime rates decreased by 1.1% and 3.7%, respectively. The City & County of Honolulu's rates for total violent crime, rape, aggravated assault, and burglary were the lowest in the State of Hawaii, while its rates for robbery and motor vehicle theft were the highest.

\* Including the violent Index Crimes of murder, rape, aggravated assault, robbery, and tracked separately, human trafficking, commercial sex acts and human trafficking, involuntary servitude; the property Index Crimes of burglary, motor vehicle theft, and larceny-theft; and, tracked separately, arson.

- Hawaii County's total Index Crime rate increased 21.7% in 2014, as the property crime rate rose 25.8%, while the violent crime rate dropped 17.4%. Hawaii County's crime rates rose for half of the eight Index Crime offenses, with a notably high increase of 71.9% for motor vehicle thefts. Hawaii County reported the lowest rate for robbery in the State of Hawaii, and the highest rate for rape based on the legacy definition.
- The total Index Crime rate in Maui County increased 0.9% in 2014; the violent crime rate rose 11.3%, and the property crime rate edged up 0.1%. Maui County reported the highest statewide rates for total Index Crimes, total violent crime, total property crime, murder, rape per the revised definition, aggravated assault, larceny-theft, and arson.
- The total Index Crime rate in Kauai County decreased 21.1% in 2014. Kauai County's violent crime rate increased 7.5%, while the property crime rate dropped 22.9%. Kauai County's rates for total Index Crime, property crime, murder, larceny-theft, motor vehicle theft, and arson were the lowest in the State of Hawaii, while its rate for burglary was the highest in the State.
- Twenty-seven murders were reported statewide in 2014. Males comprised 71.4% of the murder victims and 89.3% of the alleged offenders. Strangers comprised roughly half (46.4%) of the known relationships between murder victims and known offenders in 2014.
- Of the 2,876 murders, robberies, and aggravated assaults reported statewide during 2014, 47.4% were committed using strong-arm weapons (i.e., hands, fists, and feet); 24.5% with "other" or unknown weapons; 18.1% with knives or other edged weapons; and 10.0% with firearms.
- Over \$78 million in property value was reported stolen in the State of Hawaii in 2014, up 5.6% from the figure reported in 2013. Of the total value stolen in 2014, 25.7% was recovered, up slightly from the 24.4% that was recovered in 2013.
- No police officers were killed in the line of duty during 2014, but 336 officers were assaulted, marking a rate of 11.2 assaults per 100 officers. *Crime in Hawaii 2014* also provides data on the time of day, type of assignment, and the weapons used in assaults against police officers.
- On October 31, 2014, a total of 3,006 police officers and 770 civilians were employed by the four county police departments, denoting a 3.2% increase in workforce from the figures reported from October 31, 2013.
- Only one incident of cargo-theft, which also launched on January 1, 2014, was reported in the State of Hawaii, yielding a rate of 0.1 offenses per 100,000 resident population.

The table on the following page provides comparative state and county crime rate data by offense, offense category, and percent change from 2013.

# THE UNIFORM CRIME REPORTING PROGRAM

## BACKGROUND

The Uniform Crime Reporting (UCR) Program was initiated in 1930 by the International Association of Chiefs of Police (IACP) to meet a recognized need for a nationwide system to collect crime statistics. Since there are numerous differences in criminal codes throughout the United States, the UCR program uses a standard definition for each offense. Law enforcement agencies submit data in accordance to these definitions rather than state statutes. This standardization allows for inter-jurisdictional comparisons and internal validity of national totals.

The national UCR program is administered by the Federal Bureau of Investigation (FBI). Definitions of specific offenses, as well as reporting criteria, are contained in the FBI's *Summary Reporting System (SRS) User Manual*. The FBI provides report forms and training to city, county, and state law enforcement agencies. Crime data are collected by over 18,000 local enforcement agencies and reported to the FBI. The FBI assembles, publishes, and distributes a comprehensive annual publication entitled *Crime in the United States*, as well as periodic special reports.

In an effort to streamline procedures and provide consistency and comparability of data, the FBI promoted the development of state UCR programs. The purpose of the state-level UCR program is to collect data from local law enforcement agencies and assure compliance with standards developed jointly by the FBI and IACP.

Hawaii's UCR program was housed in the Judiciary from its inception in 1975 until 1981, when it was transferred to the Hawaii Criminal Justice Data Center, a Division of the Department of the Attorney General. In 1991, the program was transferred from the Data Center to the Research and Statistics Branch of the Crime Prevention Division, which in 1995 became the Crime Prevention and Justice Assistance Division.

The Research and Statistics Branch collects and reviews the UCR reports received from the four county police departments before forwarding the reports to the FBI. The Branch is also responsible for providing technical assistance to the contributing agencies, as well as serving as the FBI's single point of contact in the State of Hawaii.

## CRIME STATISTICS

Consistent with the UCR objectives of providing the best representation of total crime and providing the most meaningful data to police departments, the UCR program collects data on reported offenses and arrests. It is widely understood that offenses known to police are an under-representation of the total number of crimes committed, and that a truly reliable measure of unreported crimes is difficult, if not impossible, to obtain. However, the use of reported offenses as official statistics can be verified and compared over time and between jurisdictions.

Because of their seriousness and frequency of occurrence, seven offenses were initially chosen by the IACP to comprise a Crime Index and serve as indicators of our nation's crime experience: murder and non-negligent manslaughter; rape; robbery; aggravated assault; burglary; larceny-theft; and motor vehicle theft. In 1979, a congressional mandate added arson

as the eighth Crime Index Offense.<sup>1</sup> In 2013, a reauthorization act mandated the FBI to add two human trafficking offenses, commercial sex act and involuntary servitude, as Part I offenses, totaling ten Crime Index offenses.

Information reported for Index Offenses includes: the number of crimes reported; the number of offenses cleared by arrest or by exceptional means<sup>2</sup>; the number of arrests, and the value of property destroyed by arson and taken in each of the remaining offenses, except aggravated assault. (By definition, property cannot be taken in an assault. An offense that begins as an assault but ends with property being taken is classified as robbery.) The ten Index Crimes plus the crime of negligent manslaughter are referred to as Part I Offenses. While complete information is collected on non-traffic related negligent manslaughters, this offense is rare and not mentioned in *Crime in the United States*. Part II Offenses include all other offenses, except traffic, not included in Part I. The national UCR program collects and reports only arrest data for Part II Offenses, while *Crime in Hawaii* additionally contains reported Part II Offense statistics.<sup>3</sup> Total negligent manslaughter arrests, including traffic-related, are included in *Crime in Hawaii* with the Part II arrests.

Definitions of terms used in this report appear in Appendices A and B. More detailed descriptions of the UCR program can be obtained from the *Summary Reporting System (SRS) User Manual* published by the FBI. Trends in law enforcement officers killed and assaulted (LEOKA) are reported in Appendix C, and population estimates are noted in Appendix D. New data for cargo theft, effective 2014, are reported in Appendix E.

UCR program rules for classifying and counting crimes are somewhat complex and can, at times, even appear contradictory. Prior to delving into the pages that follow, first-time readers of *Crime in Hawaii* are encouraged to read the “Caveats” page. All readers are requested to review this page when attempting to answer questions about how crimes and arrests are counted and to contact us if their questions remain unanswered. Contact information is at the bottom of the “Caveats” page.

<sup>1</sup> Hawaii has collected arson offense data since 1980. The Hierarchy Rule does not apply to arson offenses. This means that all arsons which become known to the police are counted, so that crime incidents which include arson and one or more of the other Index Offenses are counted twice. As a result, the FBI does not include arsons in calculating and reporting total Index Crimes or property crimes and their respective crime rates. In order to remain consistent with federal reporting, Hawaii also does not include arsons in total Index Crimes and property crimes. Arson offenses are also not counted in the grand total of Index & Part II Offenses.

<sup>2</sup> An offense cleared by exceptional means is one in which the offender and his or her exact location are known to the law enforcement agency but, for reasons beyond the control of the agency, the offender cannot be arrested. See Appendix A for definition and examples.

<sup>3</sup> See Appendix B for definitions of Part II offenses.

## An important note about rape data

In 2013, in addition to removing the word “forcible”, the FBI also approved revisions to the UCR Program’s definition of rape<sup>4</sup>. The revised definition of rape is the penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. This revised definition encompasses all genders as victims of rape and also includes the offenses of sodomy, and sexual assaults with an object, which were previously reported to the FBI only as arrests in the other sex offenses category. The old definition, which will be referred to as the legacy definition throughout this report, is defined as the carnal knowledge of a female forcibly and against her will. The State of Hawaii commenced the collection of rape data per the revised definition on January 1, 2014.

## New additions to the UCR report

Other than the addition of arson in 1979, the UCR program has been a stable and static source of crime statistics for the U.S., allowing for crime rate comparisons between police departments and states across the nation. The FBI recently directed the participating agencies to additionally report the following offenses and arrests to its UCR program:

In 2010, in response to the *USA Patriot Improvement and Re-authorization Act of 2005*, which required the Attorney General to report cargo theft as a separate category in the FBI’s UCR system, the FBI added the offense of cargo theft. Due to the low numbers of participating agencies reporting cargo theft to the FBI, the FBI has yet to publish a cargo theft report. The State of Hawaii required the police agencies to commence the collection data for cargo thefts in January 2014; these data are reported in Appendix E.

In 2013, in order to comply with the *William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008*, the FBI added two more offenses to its Part I Crime Index track: “Human Trafficking - Commercial Sex Acts” and “Human Trafficking - Involuntary Servitude”. The Act also required the FBI to distinguish between assisting or promoting prostitution, purchasing prostitution, and prostitution, all of which are reported only as Part II arrests. The State of Hawaii initiated the human trafficking data collection in January 2014. In contrast to the *Crime in the U.S.* report, which reports human trafficking data separately, the *Crime in Hawaii* report will document human trafficking offenses as Part I violent crime offenses<sup>5</sup>, as specified in the FBI’s *SRS User Manual*. The *Crime in Hawaii* report will also document human trafficking arrests as Part I violent Index Crime arrests. Prostitution arrests will be aggregated under the prostitution category, in line with the national report.

Lastly, the FBI began collecting revised race and ethnicity data in 2013 in accordance with a directive from the U.S. Government’s Office of Management and Budget (OMB). The State of Hawaii followed suit in 2014. The race categories were expanded from four (White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander) to five (White, Black, American Indian or Alaskan Native, Asian, and Native Hawaiian or Other Pacific Islander).

---

<sup>4</sup> The State of Hawaii will continue to track rape data under the old, or legacy, definition until comparative trends have been established. This will only apply to offense data and not arrests.

<sup>5</sup> As in the case for arson, the Hierarchy Rule does not apply to both human trafficking offenses, thus all cases of human trafficking are counted. Human trafficking offenses are not included in the total Index Crime count, violent Index Crime, and the grand total of Index & Part II Offenses.

In 2014, the population of the State of Hawaii increased 1.1% from the year prior. The total number of reported Index Crimes and property crimes each increased in 2014, by 0.2%. The total number of reported violent crimes decreased 0.5%.

From 2013 to 2014 in the State of Hawaii, the number of reported offenses for five Index Crime categories decreased: murder, 6.9%; aggravated assault, 10.6%; burglary, 3.5%; larceny-theft, 0.9%; and arson, 25.2%. The number of reported offenses increased for three Index Crime categories in 2014: rape, 59.5%; robbery, 0.6%; and motor vehicle theft, 14.1%. The increase in rapes is attributable to the FBI's revised definition for the offense, which was implemented in 2014 (see page 3 for more information). Two human trafficking offenses, commercial sex acts and involuntary servitude, were also added in January 2014. One offense was reported for commercial sex acts, while none were reported for involuntary servitude. Refer to page 3 for details on the FBI's revised rape definition and human trafficking offenses.

The table on the next page lists the actual numbers of reported offenses, excluding traffic, in the State of Hawaii during the past 10 years. The population of the State of Hawaii increased 11.3% during this period, while the number of reported Index Offenses, violent Index Crimes, and property Index Crimes declined, 24.1%, 0.3%, and 25.4%, respectively.

## ARREST STATISTICS

Arrest data, including the age, sex, and race/ethnicity of the arrestees, are reported by county law enforcement agencies for all violations except most traffic offenses<sup>1</sup>. The UCR Program requires that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. As such, arrest figures do not measure the number of individual people arrested, since one person may be arrested several times during the year, for the same or different types of offenses.

Only the most serious offense is recorded for each arrest. The offenses are divided into two categories: Index Offenses, including murder, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, arson, and the two human trafficking offenses: commercial sex acts and involuntary servitude; and Part II Offenses, comprised of all other offenses, including manslaughter by negligence<sup>2</sup>. Definitions of Index Offenses and Part II Offenses are included in Appendices A and B, respectively.

In 2013, the FBI separated its “Asian or Pacific Islander” race category into two distinct groups: “Asian” and “Native Hawaiian or Other Pacific Islander”. Categories typically employed by the FBI and elsewhere in the nation are restrictive to the following: White, Black, American Indian or Alaskan Native, Asian, and Native Hawaiian or Other Pacific Islander. In this report, race and ethnicity data are presented using additional categories relevant to Hawaii: White, Black, American Indian or Alaskan Native (“Indian” in the tables), Chinese, Japanese, Filipino, Korean, Other Asian, Hawaiian, Samoan, and Other Pacific Islander.

The status offenses of truancy and ungovernability are included in the Part II arrest category of “All Other Offenses” for juveniles. The role that these status offenses play in any examination of juvenile arrest trends should be seriously considered. For example, in 2007, there were 5,214 arrests statewide for the specified status offenses, accounting for 46.4% of juvenile arrests for Part II Offenses, and 38.8% of all juvenile arrests. Thus, status offense arrests weigh heavily into the calculation of juvenile arrest totals and trends, and any adult-to-juvenile comparison based on traditional Part II totals will be biased in favor of adults.

A new table, showcasing the police dispositions of juveniles who came into contact with law enforcement, has been added to the *Crime in Hawaii, 2014* report. The categories for police dispositions of juveniles are: 1. handled within Department and released (warning,

---

<sup>1</sup> Contrary to the UCR rule in which reported offenses of negligent manslaughter are tallied for non-traffic cases only, arrest totals for this offense include both traffic and non-traffic cases.

<sup>2</sup> The division of crime categories is sometimes still made between Part I, an older term that encompassed Index Offenses plus manslaughter by negligence, and Part II, which includes all other offenses. The sections herein on reported offenses (pages 5-99) and arrests (pages 101-171) include manslaughter by negligence with the Part II Offenses for two reasons: 1) the current emphasis of the UCR Program, and this report, is on Index Offenses (which exclude manslaughter by negligence) rather than Part I Offenses; and 2) the FBI’s national report, *Crime in the United States*, groups arrest data by Index Offenses and all other offenses — arrests for manslaughter by negligence are excluded.

released to parents, etc.); 2. Referred to juvenile court or probation; 3. Referred to a welfare agency; 4. Referred to other police agency; and 5. Referred to criminal or adult court.

Two types of human trafficking offenses, commercial sex acts and involuntary servitude, were added to this report in 2014. The arrest counts for these categories are reported with the Part I violent crime sections throughout this report. Prostitution, a Part II offense, was also broken down into three categories: prostitution, assisting or promoting prostitution, and purchasing prostitution. In line with the FBI's *Crime in the U.S.* report, arrests for these three categories are collapsed and reported as "Prostitution."

An important note about rape data for arrests

The State of Hawaii began collecting data per the revised definition of rape in 2014 (see page 3 for more information). A distinction between rape cases collected under the revised and the legacy definition is only noted for data on reported offenses. The rape category for arrest data accounts for all rape arrests regardless of which definition is applied.

### Juvenile Dispositions, Kauai County, 2014

## APPENDIX A

### DEFINITIONS

**AGGRAVATED ASSAULT:** An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury; attempted murder. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. It is not necessary that injury result from an aggravated assault when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks by personal weapons, such as hands, fists, feet, etc., which result in serious or aggravated injury.

An offense is cleared by exceptional means when the identity of the offender is known; there is enough evidence to support an arrest, charge, and turning over to the court for prosecution; the exact location of the offender is known; and, for reasons outside the control of law enforcement, the offender cannot be arrested, charged, and prosecuted. Examples of offenses cleared by exceptional means include suicide of the offender, double murder, deathbed confession, and denied extradition. It should be noted that the number of offenses and not the number of persons arrested is used to count clearances. Several offenses may be cleared by the arrest of one person; or the arrest of several people may clear only one offense.

**CRIME INDEX:** The ten Part I Offenses reported in the Uniform Crime Reporting Program to represent the status of crime in the United States: murder and non-negligent manslaughter (the latter term is not used in Hawaii), rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, arson, human trafficking: commercial sex acts, and human trafficking: involuntary servitude.

More accurate crime rates (e.g., the number of rapes per 100,000 females or the number of motor vehicle thefts per 100,000 vehicles) are not reported in *Crime in the U.S.* and, therefore, are not used in *Crime in Hawaii*.

### POLICE OFFICERS KILLED AND ASSAULTED AND POLICE DEPARTMENT EMPLOYEE STATISTICS

The chart below shows a 10-year trend of police officers killed. There were no police officers killed in the State of Hawaii in 2014.

The number of police officers assaulted in the line of duty in the State of Hawaii decreased in 2014. The graph below demonstrates the trend of assaults on officers over the last 10 years. The number of assaults on police officers followed a generally downward trend with an average of about 335 assaults occurring per year. The most notable increase occurred in 2011.

By county, assaults on officers during 2014 were distributed as follows: 76.2% (256) in the City & County of Honolulu, 13.1% (44) in Maui County, 6.5% (22) in Kauai County, and 4.2% (14) in Hawaii County.

Most of the assaults on police officers during 2014 occurred when the officers were performing “other” (i.e., responding to civil disorders, interacting with mentally deranged persons, etc.) types of duties (108, 32.1%). Police officers responding to disturbance calls posed the second greatest risk (75, 22.3%). Sixty (17.9%) assaults on police officers occurred when officers were attempting an arrest. Thirty-seven (11.0%) assaults occurred while investigating suspicious persons and another 34 (10.1%) occurred while handling or transporting arrestees. Traffic pursuits and stops accounted for 22 (6.5%) of the assaults.

**POLICE OFFICERS KILLED & ASSAULTED  
by TYPE OF ASSIGNMENT, 2014**

The use of “strongarm” physical force is most often the means of assault on police officers. In 2014, 85.7% (288) of the assaulted officers were attacked by hands, fists, or other bodily means. The following chart shows the breakdown of weapons used in assaults in 2014.

**POLICE OFFICERS KILLED & ASSAULTED

## APPENDIX E

### POPULATION ESTIMATES

State and county resident population estimates for *Crime in Hawaii 2014* are from the U.S. Census Bureau.

The United States census of population is taken as of April 1 in each year ending in zero. Intercensal population estimates are made as of July 1 in each non-census year. Estimates based on the just-completed census are also made for July 1 of census years. While the FBI continues to use exact census populations to calculate crime rates in census years, the *Crime in Hawaii* reports use July 1 estimated populations to determine crime rates for all years. In so doing, a regular progression of estimates taken at 12-month intervals is available to more accurately reflect crime rate trends.
